

SMS Smart Power Station – LF/HF series

Grid/Solar/Battery/Generator Preferential Source Online Inverter

Solar Motor Systems LF/HF series of Online Inverters deliver uninterrupted pure sine wave power. The inverter is always on – *always* delivering clean, digital power irrespective of the source of energy – solar, batteries, grid or generator. NO delays, NO loss of power and 100% utilization of the solar energy collected. The programmable system intelligently manages to the most favorable energy source and dynamically adjusts to accommodate variations in the available power.
